DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

As per claims 1, 7 and 18 the closest prior art of record Erlin-US Patent 6,275,991 B1 [Erlin], Stewart et al. US Patent 6,571, 221 B1 [Stewart] and Hind et al. US Patent 6,826,690 B1 [Hind] taken either individually or in combination with other prior, art of record fails to teach or suggest the use of a remote controller for a television set that has a digital signature stored in the remote controller that is used to complete electronic transaction via the television set.

The specific allowable feature, which distinguishes the present invention over the prior art, is that the digital signature remains stored in the memory of the remote controller after the transaction is completed or canceled. As taught by Erlin, the normal practice is to erase the digital signature after the transaction is completed to minimize the risk of unauthorized access to the digital signature. Hind teaches about having a private key stored in protected storage of a device to digitally sign outbound messages for the authentication of the device. However, Hind does not disclose the combination of the stored private key in a remote controller that controls at least one function of the television set be they volume control, channel selection and color selection.

Claim 2-3, 8, 12, and 19-20 are dependent upon Claims 1, 7 and 18 respectively and thus has all the limitations of claims 1, 7 and 18 respectively and are allowable for that reason.
